

RGBCamera::showChoice

ThermalCamera::showChoice

Camera::turnOff

```
graph LR; A[RGBCamera::showChoice] --> C[Camera::turnOff]; B[ThermalCamera::showChoice] --> C;
```

The diagram illustrates a common behavior or state change. Two methods, `RGBCamera::showChoice` and `ThermalCamera::showChoice`, are shown on the left. Both methods have arrows pointing to a single method, `Camera::turnOff`, on the right. This suggests that both methods trigger the same `turnOff` operation on the `Camera` object.
